DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - a.) The status of the parent application cited on page 1 of the specification needs to be updated.

Appropriate correction is required.

Claim Rejections - 35 U.S.C. § 112

2. Claims 12-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 is vague. In line 9, the recitation of "the colorimetric determination" lacks antecedent support.

Claim 17 is vague. While the preamble of the claim recites a method for determining the amount of analyte present in the body fluid, the last part of the claim does not recite how analyte is quantitated by the responses in the first and second zones. Also, the second zone recited in claim 12 only contains a releasable labeled specific binding reagent so how is a response detected in the second zone when the label does not stay in the second zone? The claimed method is vague

because it is directed to quantitation of two analytes but the device of claim 12 only appears to provide for the detection of a single analyte.

Claims 19 and 21 are vague and indefinite because it is not clear as to what is the second analyte, Dpd. Acronyms can be recited in a claim as long as they are defined at their first occurrence.

Claim 20 is vague. The claim is not clear as to how the second analyte concentration is corrected based on the concentration of the first analyte.
